

For the Applicants of High School and other Scholarships in Mie Prefecture

1 Please know the purpose of the Scholarship

Scholarships are a system of loans for students **who are willing to study**, but despite their desire they face difficulties (economic reasons) to access high schools and colleges.

2 Scholarships are a system to "Request a Loan"

Through the scholarship, the student requests a loan to the Prefecture of Mie. Therefore, the obligation to invariably return the entire amount received as a loan after completing his/her studies and graduating is a definite rule.

It is you students, and not your parents or guardians who receive the loan. As for the return of the loan, please understand that you students by yourselves, after graduating from high schools (or universities, junior colleges, etc.), and begin to work receiving your respective salaries or remunerations, may return the loan received from these.

What will happen in the supposed case that the student does not comply with the return of the loan?

Legal measures would be taken not only against the student, but also to the parents or guardians, as well as the guarantors involved, taking into account that the refund of the total amount borrowed plus penalties or interest for late payment would be requested.
